ELSEVIER

International Journal of
Food Microbiology 23 (1994) 485–488

International Journal
of Food Microbiology

Contents of Volume 23

Number 1, September 1994

Review Paper

H. Becker, G. Schaller, W. von Wiese and G. Terplan (Germany)
Bacillus cereus in infant foods and dried milk products 1

Regular Papers

P.K. Ben Embarek (Denmark)
Presence, detection and growth of *Listeria monocytogenes* in seafoods: a review 17

J.I. Pitt, A.D. Hocking, K. Bhudhasamai, B.F. Miscamble, K.A. Wheeler and P. Tanboon-Ek (Australia, Thailand)
The normal mycoflora of commodities from Thailand. 2. Beans, rice, small grains and other commodities 35

D. Roy, J.-L. Berger and G. Reuter (Canada, Germany)
Characterization of dairy-related *Bifidobacterium* spp. based on their β-galactosidase electrophoretic patterns 55

R.M. Niemi and S.I. Niemelä (Finland)
Growth of *Enterococcus*, *Lactococcus* and *Streptococcus* strains and environmental isolates in liquid media and their reactions on BEEA 71

U.M. Abdul-Raouf, L.R. Beuchat, T. Zhao and M.S. Ammar (USA, Egypt)
Growth and verotoxin 1 production by *Escherichia coli* O157:H7 in ground roasted beef 79

D.W. Warburton, V. Arling, S. Worobec, J. Mackenzie, E.C.D. Todd, P. Lacasse, G. Lamontagne, R. Plante, S. Shaw, B. Bowen and A. Konkle (Canada)
A comparison study of the EF-18 agar/Hydrophobic Grid Membrane Filter (HGMF) method and the enzyme linked antibody (ELA)/HGMF method to the HPB standard method in the isolation of *Salmonella* 89

J. Dufrenne, P. Soentoro, S. Tatini, T. Day and S. Notermans (Netherlands, USA)
Characteristics of *Bacillus cereus* related to safe food production 99

Short Communications

J. Dufrenne, S. Tatini and S. Notermans (Netherlands, USA)
Stability of spores of *Bacillus cereus* stored on silicagel 111

R.K. Arumugaswamy, G.R. Rahamat Ali and S.N.B.A. Hamid (Australia, Malaysia)
Prevalence of *Listeria monoctogenes* in foods in Malaysia 117

Announcement 123

Number 2, October 1994

Regular Papers

E.A. Zottola and K.C. Sasahara (USA)
Microbial biofilms in the food processing industry – Should they be a concern? 125

K.S. Cudjoe, R. Krona, B. Grøn and E. Olsen (Norway)
Use of ferrous sulphate and immunomagnetic separation to recover *Salmonella enteritidis* from raw eggs 149

K.S. Cudjoe, R. Krona and E. Olsen (Norway)
IMS: a new selective enrichment technique for detection of *Salmonella* in foods 159

R.J. Venugopal, S.C. Ingham and A.R. McCurdy (Canada, USA)
Identification of psychrotrophic *Micrococcaceae* spp. isolated from fresh beef stored under carbon dioxide or vacuum 167

J. Samelis, F. Maurogenakis and J. Metaxopoulos (Greece)
Characterisation of lactic acid bacteria isolated from naturally fermented Greek dry salami 179

T. Nesbakken, E. Nerbrink, O.-J. Røtterud and E. Borch (Norway, Sweden)
Reduction of *Yersinia enterocolitica* and *Listeria* spp. on pig carcasses by enclosure of the rectum during slaughter 197

Short Communications

S. Garza, J.A. Teixidó, V. Sanchis, I. Viñas and S. Condón (Spain)
Heat resistance of *Saccharomyces cerevisiae* strains isolated from spoiled peach puree 209

P. Matias, A. Jaspe and C. SanJose (Spain)
Malate and glucose in milk incubated with psychrotrophic bacteria 215

S. Buncic and J. Panin (New Zealand, Yugoslavia)
Presence of *Aeromonas hydrophila* in slaughtered animals 221

M. Balimandawa, L. De Zutter, I. Rollier and G. Wauters (Belgium)
Influence of the inoculum concentration on the recovery of *Listeria* from meat by L-Palcamy enrichment 227

L. De Zutter, L. Le Mort, M. Janssens and G. Wauters (Belgium)
Short-comings of irgasan ticarcillin chlorate broth for the enrichment of *Yersinia enterocolitica* biotype 2, serotype 9 from meat 231

Number 3 / 4, November 1994

Preface v

Review Papers

T. Ross and T.A. McMeekin (Australia)
Predictive microbiology 241

P.J. McClure, C. De W. Blackburn, M.B. Cole, P.S. Curtis, J.E. Jones, J.D. Legan, I.D. Ogden, M.W. Peck, T.A. Roberts, J.P. Sutherland and S.J. Walker (UK)
Modelling the growth, survival and death of microorganisms in foods: the UK Food Micromodel approach 265

J. Baranyi and T.A. Roberts (UK)
A dynamic approach to predicting bacterial growth in food 277

K.R. Davey (Australia)
Modelling the combined effect of temperature and pH on the rate coefficient for bacterial growth 295

M.W. Griffiths (Canada)
Predictive modelling: applications in the dairy industry 305

Research Papers

R.L. Buchanan and L.K. Bagi (USA)
Expansion of response surface models for the growth of *Escherichia coli* O157:H7 to include sodium nitrite as a variable 317

S. Bhaduri, C.O. Turner-Jones, R.L. Buchanan and J.G. Phillips (USA)
Response surface model of the effect of pH, sodium chloride and sodium nitrite on growth of *Yersinia enterocolitica* at low temperatures 333

L.L. Zaika, E. Moulden, L. Weimer, J.G. Phillips and R.L. Buchanan (USA)
Model for the combined effects of temperature, initial pH, sodium chloride and sodium nitrite concentrations on anaerobic growth of *Shigella flexneri* 345

P.J. McClure, M.B. Cole and K.W. Davies (UK)
An example of the stages in the development of a predictive mathematical model for microbial growth: the effects of NaCl, pH and temperature on the growth of *Aeromonas hydrophila* 359

L.L. Duffy, P.B. Vanderlinde and F.H. Grau (Australia)
Growth of *Listeria monocytogenes* on vacuum-packed cooked meats: effects of pH, a_w, nitrite and ascorbate 377

P. Dalgaard, T. Ross, L. Kamperman, K. Neumeyer and T.A. McMeekin (Denmark, Australia)
Estimation of bacterial growth rates from turbidimetric and viable count data 391

T. Deak and L.R. Beuchat (USA)
Use of indirect conductimetry to predict the growth of spoilage yeasts, with special consideration of *Zygosaccharomyces bailii* 405

A.M. Gibson, J. Baranyi, J.I. Pitt, M.J. Eyles and T.A. Roberts (Australia, UK)
Predicting fungal growth: the effect of water activity on *Aspergillus flavus* and related species 419

J.E. Jones, S.J. Walker, J.P. Sutherland, M.W. Peck and C.L. Little (UK)
Mathematical modelling of the growth, survival and death of *Yersinia enterocolitica* 433

O. Reichart (Hungary)
Modelling the destruction of *Escherichia coli* on the base of reaction kinetics 449

A. Ellison, W. Anderson, M.B. Cole and G.S.A.B. Stewart (UK)
Modelling the thermal inactivation of *Salmonella typhimurium* using bioluminescence data 467
